

PRIVATE INFRASTRUCTURE NETWORK ASSESSMENT

Sovereign: the network on the grower farms

On poultry grower farms the stakes are high: a climate-control or power alarm that doesn't reach anyone in time costs a whole house. An owned, monitored network across the grower sites makes sure alarms arrive.

HALF A DAY ON SITE, WITH YOU

- We walk one representative grower farm: the houses, climate control and power systems, and the path back to your operations.
- What you have today: links, routers, contracts and the systems that depend on them.
- What fails, where and how often, from the people who deal with it.
- What it costs you, taken from your own invoices.
- Where a backbone can run and how a reliable uplink gets onto it: terrain, line of sight, high sites and power.

WHAT YOU GET

- A written report on the grower farms: today's network, the gaps and the systems at risk.
- An owned network design: backbone, distribution and access, with standby paths.
- Feasibility, checked against the terrain before anyone prices a build.
- Indicative investment and payback, calculated from your own numbers.
- The report is yours to keep, whatever you decide.

Cost of Disconnection vs Value of Connected Operations

	COST OF DISCONNECTION	VALUE OF CONNECTED OPERATIONS
Avoided loss	A climate-control or power alarm that reaches nobody in time costs a whole house.	Alarms from every house reach the right person, day and night.
Operational efficiency	Every check is a bakkie trip to the far end of the farm.	Pumps, tanks, meters and cameras visible from the office and the phone.
Infrastructure ownership	Several LTE routers and contracts, each its own point of failure.	One owned backbone that carries every system you add later.
Executive risk reduction	Problems are found late, by whoever drives past.	Management sees the whole operation, with a record of what happened and when.

R3,500 ex VAT

Half-day on-site assessment, credited in full against the build.

NEXT STEPS

- 1 A 10-minute call to agree what matters most on the grower farms.
- 2 We book the half day at a time that suits your team.
- 3 You receive the report, then decide whether to build. No obligation beyond the assessment.
