

PRIVATE INFRASTRUCTURE NETWORK ASSESSMENT

Sundays River Valley: a shared farm network

Across the Sundays River Valley there is a bigger opportunity than one farm at a time: one owned backbone that many growers share, each farm connected at a fraction of what it would cost alone. Pumps, irrigation controllers, cold rooms and cameras all ride on it.

HALF A DAY ON SITE, WITH YOU

- We walk a small group of member farms and the valley's high ground: where a shared backbone can run and how each farm joins it.
- What you have today: links, routers, contracts and the systems that depend on them.
- What fails, where and how often, from the people who deal with it.
- What it costs you, taken from your own invoices.
- Where a backbone can run and how a reliable uplink gets onto it: terrain, line of sight, high sites and power.

WHAT YOU GET

- A written report on the valley: today's network, the gaps and the systems at risk.
- An owned network design: backbone, distribution and access, with standby paths.
- Feasibility, checked against the terrain before anyone prices a build.
- Indicative investment and payback, calculated from your own numbers.
- A shared-backbone outline for the valley: which high sites serve which farms, and how a farm joins.
- The report is yours to keep, whatever you decide.

Cost of Disconnection vs Value of Connected Operations

	COST OF DISCONNECTION	VALUE OF CONNECTED OPERATIONS
Avoided loss	A pump, controller or cold-room alarm that reaches nobody shows up as a dry block, lost fruit or a warm room.	Alarms reach the right person, wherever they are on the farm.
Operational efficiency	Every check is a bakkie trip to the far end of the farm.	Pumps, tanks, meters and cameras visible from the office and the phone.
Infrastructure ownership	Every grower buys and maintains its own links.	One shared, owned backbone across the valley, each farm connected at a fraction of the cost of going alone.
Executive risk reduction	Problems are found late, by whoever drives past.	Management sees the whole operation, with a record of what happened and when.

R3,500 ex VAT

Half-day on-site assessment, credited in full against the build.

NEXT STEPS

- 1 A 10-minute call to agree what matters most on the valley.
- 2 We book the half day at a time that suits your team.
- 3 You receive the report, then decide whether to build. No obligation beyond the assessment.
