

PRIVATE INFRASTRUCTURE NETWORK ASSESSMENT

SAB Hop Farms: the network on the farms

On a farm the network isn't for email; it carries the pumps, irrigation controllers, cold rooms, cameras and the people in the field. When that rides on a patchwork of LTE routers, a failure shows up as a dry block or a warm cold room before anyone knows.

HALF A DAY ON SITE, WITH YOU

- We walk one farm: the office, pump stations, irrigation blocks and processing, and how it links to the other farms.
- What you have today: links, routers, contracts and the systems that depend on them.
- What fails, where and how often, from the people who deal with it.
- What it costs you, taken from your own invoices.
- Where a backbone can run and how a reliable uplink gets onto it: terrain, line of sight, high sites and power.

WHAT YOU GET

- A written report on the farms: today's network, the gaps and the systems at risk.
- An owned network design: backbone, distribution and access, with standby paths.
- Feasibility, checked against the terrain before anyone prices a build.
- Indicative investment and payback, calculated from your own numbers.
- The report is yours to keep, whatever you decide.

Cost of Disconnection vs Value of Connected Operations

	COST OF DISCONNECTION	VALUE OF CONNECTED OPERATIONS
Avoided loss	A pump, controller or cold-room alarm that reaches nobody shows up as a dry block, lost fruit or a warm room.	Alarms reach the right person, wherever they are on the farm.
Operational efficiency	Every check is a bakkie trip to the far end of the farm.	Pumps, tanks, meters and cameras visible from the office and the phone.
Infrastructure ownership	Several LTE routers and contracts, each its own point of failure.	One owned backbone that carries every system you add later.
Executive risk reduction	Problems are found late, by whoever drives past.	Management sees the whole operation, with a record of what happened and when.

R3,500_{ex VAT}

Half-day on-site assessment, credited in full against the build.

NEXT STEPS

- 1 A 10-minute call to agree what matters most on the farms.
- 2 We book the half day at a time that suits your team.
- 3 You receive the report, then decide whether to build. No obligation beyond the assessment.
